Dear Mr. Stride:

Congratulations on becoming the distributor for International Fuel Technology, Inc's fuel additives for Africa.

I am the owner and manager of Earl Gaudio & Son, Inc., the oldest continuously owned Anheuser-Busch distributor in the United States. We have been using International Fuel Technology, Inc.'s DiesolIFT fuel additive in our diesel truck fleet since April of 2002. The average increase in fuel economy for our trucks is over 10%.

We are completely satisfied with the product and would highly recommend its use to anyone involved in the transportation business. I should also note that in addition to the fuel savings, we are convinced that our trucks are running smoother, and the overall maintenance of the vehicles has decreased since we started using DiesolIFT.

For reference, the trucks used in our test conducted in 2002 were comprised of the following types:

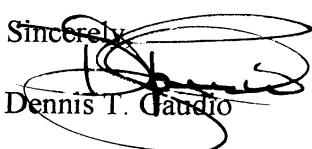

- 2001 International Harvester 8100, equipped with a DT530HT engine
- 1994 International Harvester 4900, equipped with a DT466 engine
- 1995 International Harvester 4900, equipped with a DT466 engine
- 1996 International Harvester 4600, equipped with a DT466 engine

Since this time we have purchased 3 new Freightliner tractors all equipped with Mercedes diesel engines. From our first fueling we have used DiesolIFT in all three of these trucks with no adverse effects. We continue to use DiesolIFT in all 6 trucks comprising our current fleet.

Our trucks traverse approximately 125,000 miles per year and the use of DiesolIFT has rendered significant savings.

Should any potential user wish to call me for further information I would be happy to talk to them.

Sincerely,

  
Dennis T. Gaudio
