Richmond, Tx 77469

Dickie,
As your product support representative from Mustang Cat, I wanted you to know after monitoring and observing your equipment for the past twelve years, since you started using the additive Diesel IFT, I have not seen any adverse problems in engine failures due to any related problems.

Out of the 75 plus customers that I call on, Addicks Services would have to rate in the top 3 for machine maintenance, fuel cleanliness, excellent PM programs, oil sample reporting, and excellent repair before failure component overhauls. Keep up the good work.

Neal Childers
Mustang Cat
